# Abstract

Co@Pro is such platform which connects the professionals and lets them showcase their skills. The platform has two main interfaces HR and employee. REST-API Hibernate ORM is used to integrate with Angular framework and MySQL Database. SMTP server is used for mailing activities and Twilio API for SMS.

# Introduction

- A platform that helps the professionals to get a wider exposure to events happening around in the IT world!
- This platform enables the employees to take part various technical events and learn by notifying them based upon their interests.
- The technical events range from seminars to hackathons conducted by IT companies.

# Problem Definition

In today's generation professional employees aim to build their career to greater heights, though being employed they would like to explore the growing advancements in technology and be a part of it.

*Existing*  
**Vs**  
*Proposed*

# Existing System

## YourEventFree.com

*You do not even need to be the organiser of an Event!*

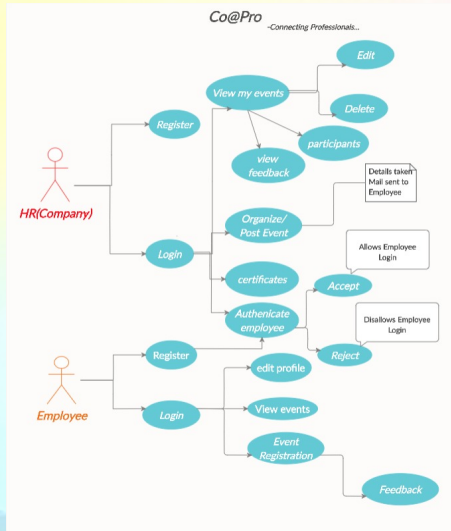

# Proposed System

## Features

- SMTP server
- SMS and OTP Generation
- Feedback submission
- Generation of pdf
